

Value Engineering Inc

CAPITAL PROJECT MANAGEMENT

From concept through completion, Value Engineering provides public project solutions. Experience in grant acquisition, engineering design, permitting, bidding and inspection takes your project over the finish line.

TEAMWORK

We are a member of the municipal team; our priority is to support the manager and elected officials.

RESPECT

A respectful and cooperative approach to all interactions fosters trust and maximizes good will.

COMMUNICATION

Answers and information are a phone call away. Daily inspection logs, comprehensive monthly reports and regular contact keep municipal officials informed.

RELATIONSHIPS

Excellent working relationships with County, State and Federal agencies to best serve client needs.

FAIR BILLING

Detailed & descriptive invoices provide transparency and experienced staff creates efficiency.

DEVELOPMENT REVIEWS

Review of Subdivision and Land Development projects relative to municipal codes, ordinances, state and federal regulations is an important service for municipal clients. An extensive initial review is vital to a perception of fairness and equitable treatment of applicants. Incorporating an understanding of local interests and needs helps to minimize adverse impacts and maximize community benefits.

Serving Southeastern Pennsylvania

Value Engineering Inc is a professional engineering firm dedicated to serving the needs of Municipal clients in the Commonwealth of Pennsylvania. The firm is founded with a goal of providing experience, value and service to clients, respectful of residents and taxpayer dollars. The firm's name reflects our philosophy.
